Technical SEO, structured data, sitemaps

Consent, privacy, script governance

REST APIs, ERP / PIM / catalog integrations

Docker, Linux, Nginx / Apache, AWS

LANGUAGES

French — native

PROFILE

Senior web engineer with a strong technical lead orientation, working on e-commerce and product environments where clarity, reliability, and maintainability matter as much as delivery. My best-fit context is existing systems: platforms with history, traffic, business pressure, SEO constraints, marketing scripts, compliance needs, and a real need to improve without creating unnecessary noise.

I am particularly strong in legacy rescue, progressive modernization, production reliability, technical SEO, consent-aware analytics, and Laravel architecture that stays readable over time.

SELECTED EXPERIENCE

E-commerce Tech Lead / Lead PHP Developer

RECENT YEARS · PREMIUM, LEGACY, AND HIGH-CONSTRAINT ENVIRONMENTS

Worked on e-commerce and product systems requiring gradual technical improvement without breaking business continuity. Focus areas included application structure, business flows, production stability, technical SEO, marketing scripts, consent boundaries, code readability, and delivery discipline.

Software and network project lead / web developer — Flippad

2021 - 2022

Website and e-commerce maintenance, internal platforms, R&D, product rebuilds, audience tracking, product-catalog synchronization, CMP-related work, and jewelry ERP exploration.

Internal survey tool — Aremedia

2021

Implemented a self-hosted LimeSurvey-based internal survey tool in a GDPR-sensitive context involving medical and socio-demographic data.

Project coordination and community work

2016 - 2019 · PARCOURS LE MONDE GRAND EST / ICN ARTEM / ASSOCIATIVE WORK

Earlier experience in coordination, communication, partnerships, public-facing operations, and structuring complex environments.

SELECTED PROJECTS

Sidewalk Studio — Laravel-based reference implementation focused on architecture, SEO, consent orchestration, editorial content, design systems, and delivery discipline.

Crown DP — Premium e-commerce platform with strong attention to architecture, internal dashboards, statistics, and long-term readability.

English — advanced professional

Spanish — intermediate

Chinese — basic

STRENGTHS

- legacy rescue
- e-commerce
- technical SEO
- privacy
- Laravel
- production quality

Godechot Pauliet — Audience tracking, catalog synchronization, and e-commerce / marketing data work in a jewelry retail context.

YTMusic Liked Sorter — CLI project showing a structured engineering mindset: typing, cache, logging, dry-run behavior, reliability, and developer experience.

EDUCATION

Meshwork Academy — Web and mobile development (2020 - 2021)

University of Lorraine — Biology degree (2012 - 2016)

What I am looking for

Contexts where engineering is expected to bring clarity, stability, modernization, and sound judgment rather than just implementation throughput.
